PORTABLES

PORTABLE CRUSHING & SCREENING PLANT

Rocktec has a long track record in the design and build of customer specific mobile plant.

Aggregate, bark, sand, green waste, coal.... Whatever you need to process, Rocktec can provide a portable plant system, from feeding to final output.

All portable units are designed to suit specific customer and site requirements and to integrate with existing plant where possible. Most are able to be designed WOF legal (No COF required).

We can incorporate customer specific requirements or equipment and work closely with you to achieve your objectives.

Talk to your local Rocktec representative about the possibilities for your site.

► Types of Plants

- Primary - Jaw, Impactor and Gyratory
- Secondary - Cone, Impactor, Hammermill, Granulator
- Tertiary - ASI, Hammerking, VSI, Cone
- Screen - Single screen or two screen unit, 1 - 3 decks. Screens can be integrated with crusher or feeder (wet or dry, cyclone if required).
